

PRECIOUS TIMES CHILDCARE SERVICES POLICIES

Sickness and Exclusion

Statement of Intent

We recognise that there are times when children are poorly and require medication or to stay at home to recover. We have this policy in place to support infection control and the health and safety of our staff and children.

Sickness

If a child becomes unwell while with us we will contact the parents / carers to come and collect. While we await the arrival of the person collecting we will make the child as comfortable as possible and care for their needs. In some instances an exclusion of 24 hours will be required (this is at managers discretion)

Where children become ill at home and are obviously unwell we ask that children are kept at home, if we feel a child is unwell and should not be in the setting when they are brought in by parents / carers we reserve the right to ask parents to take them home again.

Our exclusion policy varies according to the type of illness or infection that has been contracted, these listed below may differ slightly from advice from doctors but for infection control purposes we have the following exclusions in place. These are:

PRECIOUS TIMES CHILDCARE SERVICES POLICIES

Verruca (Plantar Warts)	No exclusion, treated and covered
Flu	Until authorised by a doctor

PRECIOUS TIMES CHILDCARE SERVICES POLICIES

Sickness and Exclusion

Children will not be allowed to attend if they are clearly unwell and relying on medicine (i.e. paracetamol and Ibuprofen). For the first 24 hours (**1 day**) after being prescribed any medicines. Unless otherwise stated in table above. In some cases their return will need to be authorised by a doctor (requires written evidence) please see list above for sicknesses and illnesses that need authorised by a doctor.

However, our exclusion policy varies according to the type of illness or infection that has been contracted.

Specialist Care

If children have long term or serious/complex medical needs they will be supported through the provision of an individual health care plan which will detail all of their information and the above exclusions about medication (relating to the condition detailed in the health care plan) will not apply.

Their health care plan will be kept within the room they are in so it is accessible at all times and all staff will be informed of the situation.

The health care plan details what should happen in the event of an emergency, as well as full details of the condition, emergency contact details and the form is regularly reviewed with the parents to ensure that any changes to the condition, care requirements or medication are recorded

In the event of an outing children's medication will be carried by a member of staff at all times along with their health care plan.

If the administration of prescription medicines requires technical / medical knowledge then individual training will be provided for staff from a qualified health professional, training will be specific to an individual Childs needs.

Emergency Situations / Extreme Circumstances (Only Applicable at the Riverside Setting)

In the event of an emergency situation i.e. high and quickly rising temperature that we are not able to bring down and there is a delay in the parent/carer being able to collect then we hold paracetamol suspension (Calpol) on site.

Upon registration Parents / Carers sign a Paracetamol Permission sheet, this enables us to deal with a quickly deteriorating situation. The manager will take the decision to administer this. This is to prevent young children from getting worse or starting to fit due to quickly rising temperature. Following the administration of this the child's temperature will continue to be monitored and we will continue to try and contact the Parents / Carers. A written record is kept of this and the parents / carers sign when they collect their child.

If a child, in our opinion is in need of emergency medical assistance and there is a delay in parents / carers being able to collect then we will call the emergency services or take to the nearest doctor's surgery. Permission for this is sought when upon registration.

The contents of this policy are at the discretion of the Manager.
